This data is an approximation.  
 \* Number of polygons has evolved over time. Polygons were developed in 2002 and have been adjusted as needed. The number referenced was calculated based on the 2017 polygon IDs.  
 \*\* Students who started at a high school were allowed to remain at that school. Trailing siblings were also allowed to enroll out of district with their older sibling, if they shared at least 1 year of high school together.

**In the past 28 years (1992-2019)**  
 Adjustments to boundaries took place in 21 years  
 Only 4 of those years did not include the opening of a new school

**In the past 10 years (2010-2019)**  
 Adjustments in boundaries took place in 5 years  
 3 years included the opening of a new school, 2 years did not  
 5 years had no boundary adjustments
