Alex- no additional moves changes but here's what we need:

- Current Title One schools indicated
- Regional programs listed for each school
- Aggregate counts of schools within or below vs above for each level, year one
- ID schools relieved directly by future capital projects
- Countywide FARM% in header or summary line at bottom for each level
- Add (2020-21) un BASE so everyone knows what year

Any positive talking points you can think of or language to explain the limitations we encountered.

Hey Tim,

I am going to hold off updating the reports until you guys finish with your meeting this morning. I'm anticipating there will be more changes. Can you just give me a call when you guys are finished?

Thanks,

Alex

Okay I'll work on that later this afternoon. Also the full 10 year data is in that dashboard sheet it's just hidden. If you want two sheets I can do that though.

Alex- I want to return 132, 1132, 2132, 2131, 4131 to WLMS instead of sending them to OMMS. It's better to have OMMS FARM stay the same then have WLMS go up. This is necessary due to the changes we made yesterday. I'll have updated numbers for the discussion this morning and we can provide updated reports later today.

I think the workbook needs to have the sheet from yesterday with the 5yr enrollment and utilization AND the simplified one with just year one and year five.

Thanks!  
Tim

Thank you Alex for everything today. A few things:

- FARM at WLMS has increased in the post measure. I believe this should be addressed.
- Do we want to show projected enrollment with projected utilization? I feel like both were requested, but I think I walked out of the room for the completion of the conversation. I do anticipate this will be a question from the Board.

I am out of the office tomorrow, but will be checking email. If you need me, text me. I will answer when I can ( [REDACTED] ).

Thanks for everything!

Alex - Great! Thank you.

Joan did ask for current boundary maps as well. Since you are making the recommendation maps, can you also make current boundaries so they look consistent?

Thanks!

**Subject:** Reports for Superintendent Recommendation

Data to be reported by school as base data and proposed. As often as possible, the Board prefers side by side reports (showing base next to scenario results). I have attached the reports that we used for reference (to reference that the base data matches your base data). Please let us know if you have any questions or concerns.

Here are the reports:

- Table with Sending school, receiving school, apprx. # of students moved, polygon #s
  - **Counts of less than 10 to be redacted**
- Capacity utilization (at least 5 years)
- Operating costs (David / Tim)
- Proximity to school (average distance from school to centroids)
- Feeds (receiving school)
- Number of non-contiguous attendance areas
- Counts of students impacted that were impacted more than once at any school level or the same student more frequently than once every five years
- Racial/ethnic composition of the student population
  - **Percentages of less than 5 or more than 95 to be redacted**
- FARM percentages
  - **Percentages of less than 5 or more than 95 to be redacted**
- Standardized test results (ES and MS PARCC-Read, PARCC-Math; HS PSAT-Read, PSAT-Math)
  - **Percentages of less than 5 or more than 95 to be redacted**
- English learners (EL) percentages
  - **Percentages of less than 5 or more than 95 to be redacted**
- Number of students moved (by school into and out of each school, with a level total)
- Boundary maps

Take care,
