

Ukeru Training

The approach, Ukeru Systems, is designed to utilize trauma-informed practices with the intent of reducing the need to use restraint and seclusion with our students. It will provide our staff with additional tools and strategies related to the following: Verbal and nonverbal communication Managing and de-escalating conflict by converting/diverting aggressive behavior Building an environment focused on comfort rather than control Physical techniques including stances, releases, blocking and redirection To secure a substitute, use code "Special Ed PL"
