

## OVERVIEW

It can feel overwhelming to plan to teach a sensitive topic. All health education curriculum and instructional materials posted on the Scope & Sequence documents are available for your use. However, it is *your responsibility* to double-check that the information is appropriate based on the grade-level objectives.

## RESOURCES

### FLASH

The FLASH curriculum includes lesson plans and diagrams used with permission from Alberta Health Services ([www.teachingsexualhealth.ca](http://www.teachingsexualhealth.ca)) and are approved for use with HCPSS Sexual Health instruction.

FLASH resources and lesson plans can be found throughout HCPSS curriculum resources. They should be **critically evaluated** to ensure that they match the HCPSS objectives before use.

The FLASH diagrams are the diagrams you **must use** during Sexual Health instruction. The only approved diagrams are the FLASH materials, linked below:

### Important Note

ONLY those materials that directly support the HCPSS Human Sexuality Curriculum objectives may be used with students.

DO NOT use materials that go beyond the scope of the HCPSS Essential Curriculum.

## Modified Materials

Modified and accommodated materials should be ***tailored to the specific needs of the student by the general educator in conjunction with the special educator(s).***

There are a variety of resources available to support teachers as they create modified materials and accommodate learners, including those listed below in Canvas.

Additionally, there are people who can support, including the following:

- HCPSS Special Education Resource teachers
- Special Education teachers at your school
- Health Education office
