Sure that's fine. I can be in just the initial meeting. They have this briefing form they use now that gets emailed around.

FYI,

Jtab just gave me a new assignment.

He wants me to work with Jason McCoy to develop an incident tracking system to be launched at the beginning of the school year. This would be a new internal website for people to enter and track incidents. The purpose is partially to alert key central office staff and partially to have better, cleaner data. Right now this is a PDF/email workflow.

I am supposed to follow up with him to get more details. Do you want to be in on that?

Subject: incident reporting web application
When: Monday, April 15, 2019 2:00 PM-3:00 PM.
Where: web suite (right outside Jtab's office)

Jason,

This is to follow up on the conversation we had today in Jtab's office about building a website/application to streamline the incident reporting process.

If you have any materials/examples of reports, I'd like to see those.

Thanks, Brendan Anderson Web Developer, Multimedia Communications
