## A few more updates from last week

Good morning,

A few additional points to clarity from last week's MS meeting.

1. The slideshow that was being used in Careers classes indicating some incorrect information has been updated and the information has been clarified with those teachers in an email this morning. Thanks for making us aware. There are no changes to how HS courses taken in MS are included, counted, etc. Your Careers teachers should have updated and corrected information as of today.

2. Regarding emails and records - there has been no systemic change to practice - yet. We will work to provide additional clarity for the district in the coming months regarding emailing records and the use of student names/student IDs. For now, please be thoughtful about student information you are emailing - especially outside of the HCPSS system. There are always risks and being thoughtful to protect our student information is important. There is no directive to do anything differently at this time. We apologize if we created a panic or undue stress. More info to come, but thank you, as always, for being thoughtful about confidentiality for our students.

Have a great afternoon. See you all after the break!

Kami
