
[Draft] Wiping an iPad

From Stephanie McAllister@hcpss.org

Draft saved Tue 9/8/2026 1:10 PM

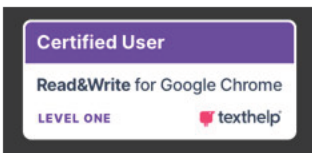

I have set the device to be wiped. Please make sure it is on Wifi. When the iPad restarts, please follow [these directions](#) on how to get back into the device. Once in the device please verify that the IOS is updated as far as it will go. Here are [directions](#) for accessing that. Once back into the iPad and the IOS is updated please email me back and I will push out the apps again. Please do not do any settings until the apps have pushed back out. You will need the student's active directory to get into the iPad. We will wait to hear from you about pushing the apps back out (please verify the apps needed).
